INSTRUCTIONS FOR COMPLETING SF 298

1. REPORT DATE. Full publication date, including day, month, if available. Must cite at least the year and be Year 2000 compliant, e.g. 30-06-1998; xx-06-1998; xx-xx-1998.

2. REPORT TYPE. State the type of report, such as final, technical, interim, memorandum, master's thesis, progress, quarterly, research, special, group study, etc.

3. DATES COVERED. Indicate the time during which the work was performed and the report was written, e.g., Jun 1997 - Jun 1998; 1-10 Jun 1996; May - Nov 1998; Nov 1998.

4. TITLE. Enter title and subtitle with volume number and part number, if applicable. On classified documents, enter the title classification in parentheses.

5a. CONTRACT NUMBER. Enter all contract numbers as they appear in the report, e.g. F33615-86-C-5169.

5b. GRANT NUMBER. Enter all grant numbers as they appear in the report, e.g. AFOSR-82-1234.

5c. PROGRAM ELEMENT NUMBER. Enter all program element numbers as they appear in the report, e.g. 61101A.

5d. PROJECT NUMBER. Enter all project numbers as they appear in the report, e.g. 1F665702D1257; ILIR.

5e. TASK NUMBER. Enter all task numbers as they appear in the report, e.g. 05; RF0330201; T4112.

5f. WORK UNIT NUMBER. Enter all work unit numbers as they appear in the report, e.g. 001; AFAPL30480105.

6. AUTHOR(S). Enter name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. The form of entry is the last name, first name, middle initial, and additional qualifiers separated by commas, e.g. Smith, Richard, J, Jr.

7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES). Self-explanatory.

8. PERFORMING ORGANIZATION REPORT NUMBER. Enter all unique alphanumeric report numbers assigned by the performing organization, e.g. BRL-1234; AFWL-TR-85-4017-Vol-21-PT-2.

9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES). Enter the name and address of the organization(s) financially responsible for and monitoring the work.

10. SPONSOR/MONITOR'S ACRONYM(S). Enter, if available, e.g. BRL, ARDEC, NADC.

11. SPONSOR/MONITOR'S REPORT NUMBER(S). Enter report number as assigned by the sponsoring/monitoring agency, if available, e.g. BRL-TR-829; -215.

12. DISTRIBUTION/AVAILABILITY STATEMENT. Use agency-mandated availability statements to indicate the public availability or distribution limitations of the report. If additional limitations/ restrictions or special markings are indicated, follow agency authorization procedures, e.g. RD/FRD, PROPIN, ITAR, etc. Include copyright information.

13. SUPPLEMENTARY NOTES. Enter information not included elsewhere such as: prepared in cooperation with; translation of; report supersedes; old edition number, etc.

14. ABSTRACT. A brief (approximately 200 words) factual summary of the most significant information.

15. SUBJECT TERMS. Key words or phrases identifying major concepts in the report.

16. SECURITY CLASSIFICATION. Enter security classification in accordance with security classification regulations, e.g. U, C, S, etc. If this form contains classified information, stamp classification level on the top and bottom of this page.

17. LIMITATION OF ABSTRACT. This block must be completed to assign a distribution limitation to the abstract. Enter UU (Unclassified Unlimited) or SAR (Same as Report). An entry in this block is necessary if the abstract is to be limited.

FORT WINGATE DEPOT ACTIVITY BUILDING SURVEY SUMMARY

April 9, 2008

The Fort Worth District Corps of Engineers performed a survey of the buildings and structures in the administrative and workshop areas of Fort Wingate in February 2008 at the direction of the Fort Wingate BRAC Environmental Coordinator (BEC). The purpose of the survey was to assess the general condition of the structures and to conduct a regulated materials survey. This information will be used by the BRAC Division to assess the condition of the structures prior to property transfer to the Department of the Interior. The survey was performed at the sole discretion of the BEC and is not a required condition of the RCRA Permit.

New information generated from this survey includes:

- Screening for the presence of lead-based paint (paint containing lead at levels greater than or equal to HUD and EPA standards) based on readings from an X-ray Fluorescence Analyzer, Model LPA-1 operated by a licensed lead inspector
- Qualitative determination of the presence and condition of asbestos containing materials by a certified asbestos inspector
- Presence of other regulated materials such as mercury thermostats, fluorescent lights, CFC containing water fountains, etc.
- Present use
- Window type
- General integrity of the structures

The following information was verified from the Fort Wingate Ordnance Depot Facilities Data Report, May 1961:

- Largest door opening
- Overall building dimensions
- Types of utility systems
- Type of fire protection system

The working condition of the air conditioning, power, fire protection system, fire alarms, sanitary sewer, floor drains, water service, heating, toilets, gas, electric, and any other systems found in the buildings was not determined in this survey. Fire extinguishers are not present in most buildings even though the *fire protection system* is hand extinguishers. The presence of hanta virus was not determined in this survey. The structural integrity criteria (good, fair, poor) is a subjective evaluation or opinion of structure's current status by the personnel performing the survey. It should not be compared to building codes, structural standards, or similar criteria. A structural assessment was not performed. Good indicates potential for reuse in like manner with minimal rehabilitation. Fair indicates potential reuse in like manner with rehabilitation. Poor indicates structure requires complete rehabilitation and currently is not suitable for reuse.

Tables listing the status of asbestos containing materials, XRF readings indicating the presence of lead-based paint, and copies of pertinent New Mexico Historic Building Inventory Forms are included as appendices.

This building was originally built at a Dispensary with desinged capacity of five (5) beds. During the original construction in 1941-1942 the first floor of Building 2 was designed as a permanent Dispensary and was used as such until the lack of permanent living quarters necessitated the construction of the modified emergency building S-44 at which time the Dispensary was moved out of Building 2 into S-44. During the Korean war, increased activities necessitated moving the Personnel Office into a larger place. At that time the north portion of S-44 was converted to office space. The dispensary occupied the south portion. After the emergency, and due to lack of both on and off most housing the north portion of S-44 was converted to family living quarters.
