## ANNOTATED ATTACHMENT 8 HAZARDOUS WASTE MANAGEMENT UNIT, SOLID WASTE MANAGMENT UNIT, AND AREA OF CONCERN TABLE

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
SWMU 1	21	TNT Leaching Beds & Building 503	RFI completed, report submitted 2001 Additional monitoring wells installed and sampled 2002-2003, report pending Bldg. 503 demolished in 1998	Soils and ground water impacted by discharges	No comments by NMED on previous submittals	NFA soils (industrial) MNA ground water
SWMU 2	21	Building 515 (Painting and Acid Washout Building and Acid Holding Pond)	RI collected 3 surface soil and 24 subsurface soil samples analyzed for explosives, SVOCs, pesticides, PCBs, metals, nitrate/nitrite, total phosphorus RI installed 1 monitoring well and sampled for explosives, metals, nitrate/nitrite, nitrate, anions	RI found elevated concentrations of pesticides and metals (chromium, copper, lead, and zinc) in 2 of 3 surface soil samples; elevated metals in subsurface soils RI found elevated ground water concentrations of metals (barium, chromium, selenium, and zinc) and fluoride	Monitoring well installed as dual purpose well, to define lateral limits of TNT Leaching Beds contamination and prove no contamination from Acid Waste Holding Pond; however, monitoring well may be too far from Acid Waste Holding Pond to prove no impact to ground water Insufficient surface soil samples Ground water not characterized	Collect 7 surface soil samples to further characterize surface soils Surface soil constituents: pesticides, metals Install and sample 4 monitoring wells to characterize ground water Ground water constituents: explosives, metals, nitrate/nitrite, nitrate, anions, perchlorate
SWMU 3	11	Fenced Storage Yard (Former Storage Yard or DRMO Area, Extended Storage Yard, Former Coal Storage Area)	RI collected 21 surface soil and 39 subsurface soil samples analyzed for VOCs, SVOCs, PCBs, metals RA collected 6 surface soil samples in this area analyzed for metals as part of their "Administration Area" reference sampling	RI found elevated concentrations of a few VOCs and metals, arsenic as high as 12 ppm RA found elevated metals (cadmium, chromium, lead, and thallium	Releases of liquids (leaking drums) documented in historical reports may require monitoring wells	NFA (industrial)

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
SWMU 4	6	Building 600 (Building 539, Ammunition Work Shop Area Change House and Laundry)	Soil investigation included 8 subsurface soil samples around abandoned cesspool, 1 surface soil sample at outfall to arroyo, and 1 sanitary sewer manhole sediment sample; samples analyzed for explosives, VOCs, SVOCs, and TAL metals Ground water investigation combined with SWMU 1 (TNT Beds) and SWMU 11B (Bldg. 542)	No explosives detected in cesspool borings, outfall to arroyo, or manhole sediment samples SVOCs and metals detected in cesspool borings Metals detected in outfall sample VOCs, SVOCs, and metals detected in manhole sediment sample Explosives detected in ground water	Laundry may have discharged to ground surface east of building Thought to be the source of explosives in monitoring well TMW11 NMED has not commented on RFI report submitted December 2002	Collect 4 surface and 4 subsurface soil samples near suspect laundry discharge pipe to determine if the source of explosives in ground water is from Building 600 Soil sample constituents: explosives, metals, perchlorate
SWMU 5	11	Building 5	RI collected 8 surface soil and 12 subsurface soil samples analyzed for VOCs, SVOCs, pesticides RI collected 1 sump sediment sample analyzed for VOCs, SVOCs, pesticides, metals USACE, Albuquerque collected additional surface and subsurface soil samples analyzed for pesticides Pesticide contaminated soils on east side removed in 1998; estimated 1 foot excavated over entire length, based on photos in closure report; 5 post-removal soil samples collected RA collected 1 water sample and 2 sediment samples from storm drainage system analyzed for VOCs, SVOCs, pesticides, PCBs, metals	RI found elevated pesticides in soil along east side of building and one pesticide in wash rack sump Extent of elevated soil pesticide levels delineated and removed RA identified elevated levels of PAHs, pesticides, and PCB 1260 in sediments present in two storm sewer manholes at NE and SE corners outside of building	RI sample locations not biased to potential discharge points (doors) Sump may indicate former location of liquid discharge RA samples in storm sewer may not represent Building 5 conditions but may be impacted by other buildings/sites draining to storm sewer system	Collect 10 surface and 10 subsurface soil samples near the doorways and other potential discharge points Soil sample constituents: metals, VOCs, SVOCs, pesticides, PCBs Investigate sump discharge to storm sewer, and potential impacts along it and at outfalls

Fort Wingate Depot Activity Post-closure Permit Draft RCRA Permit No. NM 6213820974

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
SWMU 6	11	Building 11 (Former Locomotive Shop)	RI and further characterization identified PCB contamination inside building, some evidence of release to the environment outside building (PCBs in sanitary sewer) Building remediated/demolished in 2002; additional soil removal in 2003	PCBs resolved under TSCA with USEPA Region 6	No comments from NMED on any submittals Former drains and sumps indicate possible liquid discharge to sanitary sewer and storm sewer	Collect 10 surface and 10 subsurface soil samples near the former building and the former building pad area. Bias the samples to former doorways and other potential discharge points Soil sample constituents: metals, VOCs, SVOCs, PCBs Install and sample 2 monitoring wells Ground water constituents:
SWMU 7 21	21	Fire Training Ground	RI collected 6 surface soil and 22 subsurface soil samples analyzed for	RI found elevated metals (arsenic > 3ppm) and trace VOCs and	Ground water monitoring well(s) will be necessary to prove no impact to ground	explosives, metals, nitrate/nitrite, nitrate, VOCs, SVOCs, PCBs Install and sample 4 monitoring wells to
			VOCs, SVOCs, metals RA collected 28 surface soil samples analyzed for metals and 16 subsurface soil samples analyzed for VOCs, SVOCs, and metals RA collected 7 surface soil samples analyzed for metals as part of their "Administration Area" reference sampling	SVOCs in a few samples RA found one location with SVOCs, a few very low VOC levels (<1ppm) which are probably lab contaminants RA found elevated metals (cadmium, chromium, lead, nickel, thallium, vanadium, and zinc)	water	characterize ground water Ground water constituents: explosives, metals, nitrate/nitrite, nitrate, VOCs, SVOCs, PCBs

3

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
SWMU 8	6	Building 537 (Pesticide and Field Battery Shop)	RI collected 6 subsurface soil, 1 sump sediment, 1 sump water and 5 wipe samples analyzed for pesticides RA collected 7 surface soil samples analyzed for herbicides, metals RA collected 4 surface soil samples analyzed for VOCs, SVOCs, pesticides, PCBs, herbicides, metals RA collected 59 soil samples analyzed with chlordane test kits, and 18 confirmatory lab samples analyzed for chlordane RA collected 1 septic tank sediment sample analyzed for VOCs, SVOCs, pesticides, PCBs, metals RA collected 2 soil samples near septic tank outfall PCB impacted (greater than 1 ppm) soil "hotspot" (approximately 187 tons) removed in 2003 and disposed in chemical waste landfill	RI found elevated levels of pesticides (only constituents analyzed) RA found elevated levels of chlordane, and metals including lead, copper, zinc RA found PCB1260 in all 4 samples tested RA found elevated metals (arsenic = 19 ppm, barium = 410 ppm cadmium = 1.9 ppm, chromium = 23.1 ppm, mercury = 1.5 ppm, nickel = 15.7, zinc=99.8) and PCB1260 in septic tank sediment and water valve box; PAHs also in septic tank sediment Approximately 260 cubic yards of PCB impacted soil remain in place; amounts of pesticide and metals impacted soils also remain	Concrete pad with drain formerly located east of Building 537 reportedly a shed used for battery draining and refilling; pad removed 2003 Presence of PAHs, PCBs, and elevated metals in septic sediments not addressed Septic system not abandoned as planned; funding spent on PCB impacted soil disposal Because of building's use for a pesticide handling operation, PCB impacted soil was also considered a listed waste for pesticides; requiring treatment (chemical oxidation) prior to land disposal Building currently being utilized by TPL for demilitarization operations	Install and sample 4 monitoring wells to determine if practices have impacted ground water Ground water constituents: explosives, metals, nitrate/nitrite, nitrate, SVOCs, pesticides, PCBs, perchlorate

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
SWMU 9	7	POL Waste Discharge Area	RI collected 5 surface soil and 30 subsurface soil and 3 surface water samples analyzed for VOCs, SVOCs, PCBs, metals	RI did not identify elevated levels of constituents (zinc slightly above background at the time)	Ground water monitoring well(s) will be necessary to prove no impact to ground water	Collect 5 surface soil samples to further characterize Soil constituents: VOCs, SVOCs, PCBs, metals Install and sample 4 monitoring wells to characterize ground water Ground water constituents: explosives, metals, nitrate/nitrite, nitrate, VOCs, SVOCs, pesticides, PCBs
SWMU 10	11	Sewage Treatment Plant (includes Buildings/ Structures 22, T- 37, 63, 69, 70, 71, 72, 73, 74a, 74b, 74c, 74d, 82, 83, document incinerator, Structure 745, drainage ditch, septic system at sewage treatment plant)	RI collected 15 subsurface soil samples analyzed for explosives, VOCs, SVOCs, metals, nitrate/nitrite, total phosphorus RI installed 1 monitoring well and collected ground water samples analyzed for metals (total and dissolved), anions, total hardness, trihalomethanes RA collected 2 soil and 1 septic tank sediment samples analyzed for VOCs, SVOCs, pesticides, PCBs, metals	RI found elevated metals Document Incinerator broken out as a separate AOC based on UXO concerns RI found elevated ground water metals concentrations; chloride and sulfate concentrations exceeded secondary MCL concentrations RA found elevated metals UXO cleared in 1998; no environmental sampling after removal, but site is within fence for active sewage treatment plant This is an active sewage treatment plant receiving sewage from current installation activities	Ground water not characterized No surface soil samples Current FWDA activities may be contributing to detections No post-removal sampling at document incinerator	NFA (industrial)

AOC 32	19	Igloo Block F	During the RI, 9 surface soil samples were collected under igloo drains, and 3 surface soil samples were collected in storage revetments; these samples were analyzed for munitions constituents including explosives, nitrate/nitrite, and phosphorus	No constituents were detected exceeding background levels	DOI wants more interior sampling NMED may want more than "representative" sampling both interior and exterior NMED presumes that the igloos will be washed/remediated May need to investigate other structures such as pre-1940 magazine locations, loading docks, dunnage buildings, rail lines, etc. within igloo block	None (like use)
SWMU 33	3	Waste Pile KP1	Solid matrix characterized as part of Phase IA of OB/OD CFP Ground water characterized as part of Phase IB of OB/OD CFP	See reports (too much info for this table)	Within Kickout Area NMED has not commented on Phase IA and IB reports	RCRA CA
AOC 34	19	Igloo Block G	During the RI, 24 surface soil samples were collected under igloo drains, and 3 surface soil samples were collected in storage revetments; these samples were analyzed for munitions constituents including explosives, nitrate/nitrite, and phosphorus	No constituents were detected exceeding background levels	DOI wants more interior sampling NMED may want more than "representative" sampling both interior and exterior NMED presumes that the igloos will be washed/remediated May need to investigate other structures such as pre-1940 magazine locations, loading docks, dunnage buildings, rail lines, etc. within igloo block	None (like use)
AOC 35	2	Igloo Block H	During the RI, 24 surface soil samples were collected under igloo drains; these samples were analyzed for munitions constituents including explosives, nitrate/nitrite, and phosphorus	Only phosphorus was detected slightly above background in one sample	DOI wants more interior sampling NMED may want more than "representative" sampling both interior and exterior NMED presumes that the igloos will be washed/remediated May need to investigate other structures such as loading docks, dunnage buildings, rail lines, etc. within igloo block	None (like use)

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 36	2	Igloo Block J (includes Missile Launch Pad used by MDA)	During the RI, 18 surface soil samples were collected under igloo drains; these samples were analyzed for munitions constituents including explosives, nitrate/nitrite, and phosphorus	Only phosphorus was detected slightly above background in one sample	DOI wants more interior sampling NMED may want more than "representative" sampling both interior and exterior NMED presumes that the igloos will be washed/remediated May need to investigate other structures such as MDA missile launch facility, loading docks, dunnage buildings, rail lines, etc. within igloo block	None (like use)
SWMU 37	11	Building 9 (Machine Shop and Signal Shop)	Not identified as area of concern for RI RA collected 6 surface soil, 18 subsurface soil, 2 sediment, and 3 sump sediment samples analyzed for VOCs, SVOCs, PCBs, metals, total phosphorus RA also collected 2 wipe samples analyzed for PCBs	RA found elevated levels of 1 VOC (probable lab contaminant), PAHs, PCBs, and metals (cadmium, chromium, copper, and lead) in soil and sediment outside the building One PCB detected in each wipe sample	Detections of PAHs, PCBs, and elevated metals not delineated Parts of this building have a wooden floor that could allow contaminants to be discharged to the ground under the building Sediment samples collected in drainage ditch may indicate migration away from building, or may be impacted by other buildings/sites draining to the ditch	Collect 4 surface samples near the building to delineate extent of contamination Collect 10 subsurface soil samples under wooden floor of building Collect 6 sediment samples to delineate the extent of contamination Soil and sediment sample constituents: metals, VOCs, SVOCs, PCBs

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
SWMU 38	20	Functional Test Range 1	RI collected 5 surface soil samples analyzed for explosives, nitrate/nitrite, total phosphorus; RI also collected 4 sediment samples analyzed for explosives, VOCs, SVOCs, pesticides, metals, nitrate/nitrite, total phosphorus UXO cleared in 1997 RI follow-on collected 13 surface soil, 17 sediment, and 3 waste samples analyzed for explosives, metals, TCLP metals (waste only), TPH-DRO/GRO (selected sediments only) RA collected 29 surface soil, 30 subsurface soil, and 5 sediment samples analyzed for explosives, metals, TPH- DRO/GRO	RI found elevated metals; characterization effort was limited by the presence of possible UXO RI follow-on found explosives, elevated metals, and TPH- DRO/GRO in selected areas; waste not hazardous RA found explosives and elevated metals	NMED believes there are "burial pits" within FTR 1 UXO clearance may have allowed significant quantities of ordnance related scrap (flare slag, debris, etc.) to remain on-site below surface UXO Clearance statement recommended additional subsurface clearance on 37.5 acres	Additional subsurface UXO clearance planned on 37.5 acres
SWMU 39	19	Pistol Range	RI collected 5 surface soil samples analyzed for metals RI collected 1 surface soil sample analyzed for TCLP lead Soil removed 1999, post removal soil samples collected and analyzed for lead	RI found elevated lead levels; TCLP lead concentration = 63,000 ug/I confirmation samples less than 50 ppm lead with three exceptions (57.3, 132, and 383 ppm)	NMED pushing for more sampling; concerned with potential surface water runoff Some visible bullets remain on-site; unclear if these are leftovers or additional following removal	NFA

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
SWMU 40		South Administration Area Formerly named the Coal Tar Storage Tanks (Structures 58, 59, and 60), SWMU 48 (Building 10), SWMU 49 (Building 12), SWMU 50 (Building 13), SWMU 51 (Building 29), SWMU 52 (Building T-33), SWMU 53 (Building 36), SWMU 54 (UST #5), AOC 55 (Structure T-49), AOC 56 (Building T-50), AOC 72 (Building 14), SWMU 77 (Building T-34), AOC 83 (Structure 63), and AOC 87 (Structure 57)	Characterization at Coal Tar Storage Tanks and Bldg. 29 only; other sites were not identified as SWMUs/AOCs prior to Draft Permit <u>Coal Tar Storage Tanks</u> RI collected 1 surface soil and 3 subsurface soil samples analyzed for SVOCs Tanks and surface soil in 1999, post- removal surface soil samples collected and analyzed for metals, SVOCs RA collected 8 surface soil samples analyzed for arsenic <u>Bldg. 29</u> RI collected 4 surface soil samples analyzed for pesticides, herbicides RA collected 7 subsurface soil and 2 sediment samples analyzed for herbicides, PCBs	Coal Tar Storage TanksRI looked for SVOCs only; detected noneTanks and surface soil removed in 1999Confirmation samples did not detect SVOCs or metals above background, but arsenic detection limit exceeded background and screening levelsRA analyzed arsenic only; elevated arsenic levels in 2 of 8 samples (8 and 12 ppm)Bldg. 29RI found one pesticide (DDE at 0.0103 ppm) in one of four surface soil samplesRA found PCBs at 35.8 ppb in 1 soil sample and 45.4 and 49.6 ppb in 2 sediment samples	Coal Tar Storage Tanks NMED has not reviewed or commented on removal documentation Bldg. 29 Building demolished in 1999; no indication of post-removal sampling RA may satisfy post-removal sampling RA soil samples located near former loading/unloading areas by doors, and under building PCBs <1ppm in soil adjacent to former building location below TSCA standard, do not need to be addressed	<u>Coal Tar Storage</u> <u>Tanks</u> NFA (industrial) <u>Bldg. 29</u> NFA (industrial)
AOC 41	16	Igloo Block K	During the RI, 6 surface soil samples were collected under igloo drains; these samples were analyzed for munitions constituents including explosives, nitrate/nitrite, and phosphorus	2,4-DNT, 2,6-DNT, and TNT were detected in one sample at concentrations of 510 ppm, 20.5 ppm, and 1.78 ppm, respectively; only 2,4-DNT exceeds the NMED Residential SSL of 120 ppm, and the detected value is less than the NMED Industrial SSL of 1,370 ppm Nitrate/nitrite was detected above background in another soil sample	DOI wants more interior sampling NMED may want more than "representative" sampling both interior and exterior NMED presumes that the igloos will be washed/remediated May need to investigate other structures such as pre-1940 magazine locations, loading docks, dunnage buildings, rail lines, etc. within igloo block	None (like use)

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 42	6	Building 516 (Ammunition Receiving Building)	None (not identified as an AOC prior to Draft Permit)			
AOC 43	7	Railroad Classification Yard	None (not identified as an AOC prior to Draft Permit)			2
AOC 44	10	Former Administration and Utilities Area	None (not identified as an AOC prior to Draft Permit)			
SWMU 45	11	Building 6 (Gas Station)	Bldg.6 was not identified as a SWMU/AOC prior to Draft Permit Associated USTs removed in 1993 In the Feb 1993 UST Closure Report submiRAed to the NMED UST Bureau on Mar 1, 1993, the Site (Site One) encompassing the locations of USTs #1- 4 was identified as requiring the completion of a Minimum Site Assessment (MSA) As part of the subsurface investigation for this site, three ground water monitoring wells were installed in 1994	Following completion of the UST Bureau's requirement for two years of continuous quarterly sampling from these monitoring wells, FWDA requested that the quarterly sampling be discontinued, in August, 1998 Received NFA status from NMED UST Bureau in 1999	NMED has reopened this site for Corrective Action	None
AOC 46	11	Above Ground Tank located near Blg. 11	None (not identified as an AOC prior to Draft Permit)	an dana		
4OC 47	11	TPL spill of photoflash powder west of Blg. 11	FWDA believes that the release was addressed with the removal and off-site disposal of 6,000 pounds of barium- impacted soil in September 2002; FWDA understands that TPL has or will provide documentation of this cleanup to NMED			
AOC 48	11	Building 34 (Fire Station)	None (not identified as an AOC prior to Draft Permit)	14 A.		a Paras a

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 49	11	Structure 38 (End Loading Dock) and Structure 39 (Side Loading Dock)	None (not identified as an AOC prior to Draft Permit)			
SWMU 50	11	Structure 35 (Underground Storage Tank (UST #7) located by Building 45)	UST was removed in Feb 1995 Laboratory analysis of the soils sampled from the excavation area confirmed the presence of petroleum hydrocarbons consistent with gasoline A Minimum Site Assessment (MSA) was initiated in November 1996; as part of the MSA, three ground water monitoring wells, numbered MW-1, MW-2, and MW- 3 were installed.	The MSA report for this UST was submitted to the NMED UST Bureau on Mar 17, 1998, requesting site closure Received NFA status from NMED UST Bureau in 1999	NMED has reopened this site for Corrective Action	
AOC 51	6 or 11	Structure 64 (Underground Storage Tank)	None (not identified as an AOC prior to Draft Permit)			
AOC 52	11	Building 79 and Building 80 (Storage Vaults)	None (not identified as an AOC prior to Draft Permit)			

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 53	13	Lake Knudson	One surface water/sediment sample pair collected in 1981 Three surface water/sediment pairs collected during RI; samples analyzed for VOCs, SVOCs, explosives, pesticides, nitrate/nitrite, phosphorus, and TAL metals	Low concentrations of chromium and phosphorus detected in 1981 surface water sample; oil and grease detected in 1981 sediment sample Nitrate/nitrite, phosphorus, and metals detected in RI surface water and sediment samples Surface water and sediment sample results did not indicate that Lake Knudson had been impacted by releases from FWDA operations There are no non-storm water discharges to Lake Knudson	Lake Knudson is a man-made, seasonal body of water	None
AOC 54	13	Building 311 (Standard Magazine)	None (not identified as an AOC prior to Draft Permit)			
AOC 55	13	Structure 506 (TNT Storage Barricade)	None (not identified as an AOC prior to Draft Permit)			
AOC 56	13	Structure 533 (Explosive Barricade)	None (not identified as an AOC prior to Draft Permit)			
AOC 57	16	Buildings 306, 307, 308, 309, 310 (Standard Magazines near Knudson Lake)	None (not identified as an AOC prior to Draft Permit)			

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 58	19	Buildings 303 and 304 (Standard Magazines) and 320 (Field Dunnage Building along Arterial Road No. 3)	None (not identified as an AOC prior to Draft Permit)			and the
AOC 59	19	Building T-422 (former Blg. X-11, Normal Maintenance Blg., Bomb and Shell Paint Blg.)	None (not identified as an AOC prior to Draft Permit)			
AOC 60	21	Building 522 formerly designated as Building 500 (Ammunition Receiving Bldg.)	None (not identified as an AOC prior to Draft Permit)			
AOC 61	21	Building 507 (Smokeless Powder Magazine)	None (not identified as an AOC prior to Draft Permit)			
AOC 62	21	Building 508 (Smokeless Powder Magazine)	None (not identified as an AOC prior to Draft Permit)			
AOC 63	21	Building 509 (Primary Collector Barricade or Propellant Baghouse)	None (not identified as an AOC prior to Draft Permit)			
AOC 64	21	Building 510 (Vacuum Producer Building)	None (not identified as an AOC prior to Draft Permit)			
AOC 65	21	Building 511 (Service Magazine)	None (not identified as an AOC prior to Draft Permit)			

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 66	21	Building 512 (Service Magazine)	None (not identified as an AOC prior to Draft Permit)		Tana (Hall)	
AOC 67	21	Building 513 (Service Magazine)	None (not identified as an AOC prior to Draft Permit)			
AOC 68	21	Structure 514 (Deboostering Barricade) and Structure 545 (Earthen Barricade)	None (not identified as an AOC prior to Draft Permit)			
AOC 69	22	Buildings 301, 302, and 312 (Standard Magazines), Building 316 (Field Lunch Room),	None (not identified as an AOC prior to Draft Permit)			
SWMU 70	22	Disassembly Plant and TPL QA Test Area (Disassembly Plant includes Building 517, Structure 518, Building 519, Structure 520, Structure 521, Structure 547) Disassembly Plant and TPL QA Test and OB/OD Area	None (not identified as a SWMU prior to Draft Permit)			
AOC 71	22	Former rectangular structure near TMW-5 and north of Blg. 528	None (not identified as an AOC prior to Draft Permit)			

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
SWMU 72	21 and may include 22	Deactivation Furnace, Deactivation Furnace Acid Pits, and surrounding area (includes pre- 1958 buildings and areas in the vicinity of Blg. 530)	RI collected 19 surface soil and 9 subsurface soil and 3 sediment samples analyzed for metals, total phosphorus, sulfate UXO clearance completed 1997 RA collected 8 surface soil and 8 subsurface soil samples analyzed for explosives, metals, total phosphorus NMED collected 8 surface soil samples analyzed for perchlorate	RI found elevated concentrations of metals in surface and subsurface soils RA found elevated concentrations of metals and total phosphorus in surface and subsurface soils NMED did not detect perchlorate UXO clearance activities recovered 1.25 pounds of propellant grains	Insufficient soil samples analyzed for explosives NMED has added pre-1958 buildings based on aerial photos; function of/operations at pre-1958 buildings may not be documented	Collect 10 surface and 10 subsurface soil samples to further characterize Soil constituents: explosives, metals, total phosphorus
AOC 73	23	Former buildings or structures along Road C-3.	Some characterization of one of two buildings in this AOC completed as part of RI; site of Bldg. T-332 was mistakenly identified as "Current Landfill" RI performed geophysics (EM/MAG/GPR) to locate "landfill" RI collected 18 subsurface soil samples analyzed for VOCs, SVOCs, pesticides, PCBs, metals RI screened passive soil gas samples for methane, hydrogen sulfide	Minimal subsurface debris present based on geophysics Only metals detected in subsurface soil samples Minimal methane, no hydrogen sulfide soil gas detected	No characterization for asbestos NMED has observed "suspicious" materials/debris (yellow chunk material, roofing materials) that led to the listing of this AOC in the Draft Permit	NFA for "Current Landfill"
SWMU 74	3	Area 16 or Site 16 (Proposed Burning Ground) – to be addressed under the Kickout Area requirements unless the location is determined to be outside the Kickout Area boundary as defined Section IV.A	Not identified as a SWMU prior to Draft Permit UXO clearance in 1999 (based on NMED "request")	Some ordnance related scrap observed and removed	Scrap believed to be kickout from OB/OD	

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	issues	Proposed Path Forward Before Permit
AOC 75	6, 7, 11, 12, 13, 19, 21, 22, and may include other parcels	Electrical Transformers (at least 65 former or existing transformers)	Sampling at some locations completed, but not well documented		NMED does not have TSCA primacy	
AOC 76	2	Feature 19 on the 1973 aerial photo (API-5) in the 1995 Archive Search Report.	None (not identified as an AOC prior to Draft Permit)			
AOC 77	2	Feature 20 on the 1973 aerial photo (API-5) in the 1995 Archive Search Report.	None (not identified as an AOC prior to Draft Permit)			
AOC 78	5	Feature 18 on 1973 aerial photo (API-5) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			
AOC 79	6	Feature 2 on 1973 aerial photo (API-5) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			
AOC 80	6	Feature 9 on 1962 aerial photo (API-3) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 81	6	Feature 11 on 1962 aerial photo (API-3) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			
AOC 82	6 and 5	Feature 18 on 1973 aerial photo (API-5) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			
AOC 83	6	Feature 22 on 1973 aerial photo (API-5) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			
AOC 84	6	Feature 12 on 1962 aerial photo (API-3) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			
AOC 85	9	Feature 11-1 on 1962 aerial photo (API-3) in 1995 Archive Search Report and Feature 1 on 1973 aerial photo (API-5) in 1995 Archive Search Report.	None (not identified as an AOC prior to Draft Permit)			
AOC 86	13	Feature 15 on 1973 aerial photo (API-5) in 1995 Archive Search Report.	None (not identified as an AOC prior to Draft Permit)			
AOC 87	21	Feature 18 on 1962 aerial photo (API-3) and Feature 23 on 1973 aerial photo (API-5) in 1995 Archive Search Report.	None (not identified as an AOC prior to Draft Permit)			

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 88	22	Former buildings or structures and disposal areas southwest, south, and southeast of Blg. 528.	None (not identified as an AOC prior to Draft Permit)			
AOC 89	3	Feature 30 and Feature 34 on 1973 aerial photo (API-5) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			
AOC 90	3	Feature 36 on 1973 aerial photo (API-5) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			
AOC 91	3	Feature 41 in the 1973 aerial photo (API-5) and Feature 27 on the 1978 historic aerial photo (API-7) in the 1995 Archive Search Report.	None (not identified as an AOC prior to Draft Permit)			
AOC 92	3	Feature 31 on the 1973 historic aerial photo (API-5) and Feature 21 on the 1978 aerial photo (API-7) in 1995 Archive Search Report	None (not identified as an AOC prior to Draft Permit)			

SWMU/AOC Number as of 08/05	Parcel	Description	Environmental Characterization Completed	Summary of Environmental Condition	Issues	Proposed Path Forward Before Permit
AOC 93	Un- known	Bivouac and Tank Training Area	None (not identified as an AOC prior to Draft Permit)		Despite several iterations of supplemental information regarding the type of "tanks" (tracked anti-aircraft weapons systems) used and several reports and interviews with NM NG personnel that stated weapons were NOT fired during training, NMED has chosen to be "conservative" and believe a single report which contained a typo stating "weapons were fired"
