Subject: FWDA Parcel 3 Well Installation Project

Ben: I'm writing to request your approval for a proposed change in location for one of the replacement monitoring wells in the FWDA Parcel 3 Well Installation project. As shown in the attached figure, the original location of the well was just inside the inner fence boundary. The proposal is to place the well immediately outside the inner fence, approximately 50-80 feet away from the original well's location.

The purpose of this change is to simplify access, improve safety, and avoid impacting the fence. The new location is adjacent to the arroyo that the previous well was targeting, and the elevation is consistent with the previous location. Attached is a photograph showing the previous location and the proposed location, and also a map view of the overall distance.

Please let me know if you have any questions regarding this request. I shall be leaving in a few hours for a two week trip to Germany. Please send any correspondence concerning this request to Alan Soicher, the FWDA Project Manager.

Thank you.

v/r,

George

George and Alan,

The change in location for well CMW43 is approved.

Thanks,

Ben Wear
