Subject: RE: [EXTERNAL] FWDA Parcel 3 Well Installation Project

Ben,

Thank you for providing the approval for this change to the location of well CMW43. As an update, the Contractor drilled at the new location, set a temporary well, and let the well sit. After four days, the well was revisited and determined to be dry, and so will not be able to serve as the replacement for CMW43. While this option would have provided a better solution in terms of access and safety, the Contractor has now located another site south of the fence within 20 feet of the original well, and is proposing to install the replacement well in that location. The attached photo shows the original CMW43 location (right side of blue stake), and the proposed replacement well location (left side of yellow implement).

Please let me know if you approve of this proposed change, and/or if have any questions.

Thank you.

Alan
